

Aurora Main Tex

This component allows you to generate the MainTex for the SgtAurora component.

Aurora

This allows you to set the aurora the generated texture will be applied to.

Width

This allows you to set the resolution of the aurora texture noise.

Height

This allows you to set the resolution of the bottom/top color transition.

Format

This allows you to set the format of the generated texture.

Noise Strength

This allows you to set the minimum alpha of the noise.

Noise Points

This allows you to set how many times the alpha

Noise Seed

This allows you to set the random seed used when generating the noise.

Top Ease

This allows you to set the transition style between the top and middle.

Top Power

This allows you to set the sharpness of the Top Ease.

Middle Point

This allows you to set the point that divides the top and bottom.

Middle Color

This allows you to set the color of the middle of the aurora.

Middle Ease

This allows you to set the transition style between the middle and top.

Middle Power

This allows you to set the sharpness of the Middle Ease.

Bottom Ease

This allows you to set the transition style between the middle and bottom.

Bottom Power

This allows you to set the sharpness of the Bottom Ease.
