Ring Main Tex Filter

This component can be used to generate the **Main Tex** alpha channel for the SgtRing component.

This is useful if your ring texture is from satellite pictures which don't contain alpha data.

Ring

The SgtRing the filtered texture will be applied to.

Source

The original texture.

NOTE: This must be readable.

Format

The texture format of the output texture.

NOTE: This must be an RGBA format.

Power

The sensitivity of the alpha channel relative to the RGB channels.
